2016 RECOGNITION OF PERSONAL AND PROFESSIONAL ACHIEVEMENTS
The Crystal Eagle Leadership Award is presented annually to a member of the American Society for Healthcare Engineering (ASHE) whose contributions have affected the health care facility management profession and made a difference to the Society. Often referred to as “ASHE’s lifetime achievement award,” this award recognizes those who have been instrumental in the creation and optimization of healing environments.

MARK KENNEDAY, MBA, CHFM, FASHE, CHC
Vice Chancellor Campus Operations
The University of Arkansas for Medical Sciences
Little Rock, AR

The 2016 Crystal Eagle Leadership Award is presented to Mark Kenneday, Vice Chancellor of Campus Operations at the University of Arkansas for Medical Sciences.

Mark has a Bachelor’s Degree from the University of Houston in Construction Management and an MBA from UH with a concentration in Service Marketing.

In 2013, Mark served as ASHE president, working tirelessly to make strides in ASHE’s strategic imperatives: sustainability, member value, and succession planning.

With more than 30 years of experience in health care facilities management, Mark has served in various committee and board roles including President of TAHFM, Texas Association of Healthcare Facilities Management, where he now serves on their Board of Directors with emeritus status. He also serves on the Board of Directors for the Arkansas Association of Healthcare Engineering (AAHE).

Mark has helped develop three ASHE publications, including the Health Care Facility Commissioning Guidelines and Handbook, and continues to serve the organization as a volunteer faculty member.

Kenneday’s passion for the health care facility management field and unfading pursuit to mentor and inform other professionals has made ASHE proud to name him the 2016 Crystal Eagle Leadership Award recipient.
The President’s Award is presented at the discretion of the sitting ASHE president to an individual who has made significant contributions to the health care facility management profession and has gone above and beyond the call of duty in support of the Society.

MICHAEL HATTON, RPA, SMA, SASHE
Vice President
Memorial Hermann Healthcare System
Houston, TX

Michael’s tireless pursuit to advance our profession and share the knowledge he has gained in his successful career are unparalleled.

Michael Hatton is Memorial Hermann’s Vice President of Facilities Engineering and President of the Texas Association of Health Care Facility Managers.

In his role as a Vice President, Michael has always been a true advocate for the field. He understands the significance of his teams’ contributions to the Memorial Health System and ultimately the patients in their care. More importantly, he ensures they have the resources and support to maximize their contribution to value to the mission of the organization.

Under Michael’s leadership, Memorial Hermann has saved $87 million since beginning its energy conservation initiative in 2008. Today, nine of Memorial Hermann’s thirteen hospitals are Energy Star-certified. This is an incredible achievement when you consider that only 56 hospitals across the country currently have this certification.

Michael’s role as a VP in the Memorial Hermann health system does not preclude him from volunteering in an effort to advance our field. Michael is currently serving as the President of the Texas Association of Health Care Facilities Managers. He also developed and organized the first ever ASHE chapter energy challenge in Texas, which has grown to include other states. Michael sits on the ASHE sustainability committee, as well, and is leading the effort to update the 2016 Energy Star survey.

Michael’s tireless pursuit to advance our profession and share the knowledge he has gained in his successful career are unparalleled. That is why we are pleased to announce Michael as the 2016 President’s Award recipient.
The Regional Leader Award recognizes individuals who have demonstrated excellent leadership qualities and made significant contributions within their local chapter and to the field of health care engineering and facilities management; planning, design, and construction; safety; clinical and biomedical engineering; and technical management. One member from each ASHE region receives this award.

The Excellence in Health Care Facility Management Award, sponsored by Trane, is one of the ASHE’s highest honors. Recipients of the award exemplify how facility managers and caregivers join together to identify an issue and create a proactive and viable approach to it that improves patient care and satisfaction through innovation in facility management operation.

This award is more than just a plaque. Winners receive recognition from industry peers on a national level. They have the opportunity to share their innovations and educate others. Their careers are elevated, and new experiences take shape.

The Vista Awards recognizes teams that have worked together to develop and maintain safe, quality health care environments; demonstrate effective communication; and rely on data-based decision-making processes.

The Vista Awards are granted based on team collaboration and focus on the project’s key stakeholders—individuals who have been involved from inception to completion as well as during any post-occupancy evaluations.

NEW CONSTRUCTION
Constructing a new facility, essentially from the ground up. The new facility may be connected to an existing facility, but the building must have its own identity and be a new space.

SSM Health St. Mary’s Hospital — Jefferson City
Jefferson City, Missouri

RENOVATION
Altering existing conditions or adding new space to existing structures. The original building envelope remains essentially intact.

VCU Health —
Emergency Department Expansion and Renovation
Richmond, Virginia

INFRASTRUCTURE
Modifying or replacing major portions of the utility generation, distribution, or control systems. These changes involve significant project planning.

CMC Pineville Energy Plant,
Carolinas HealthCare System
Charlotte, North Carolina

The Energy to Care Awards program encourages hospitals across the country to reduce their energy consumption by 10 percent or more over their baseline score. These recipients are dedicated to sharing fundamental concepts, best practices, proven strategies, real data, and financial tools that contribute to energy savings in support of patient care. ASHE recognizes the following health care facilities for their achievements in energy efficiency.
