**WATTS®**

# Watts Solutions for Fighting Legionella

## IntelliStation® Digital Mixing System

- Delivers water within  $\pm 2^{\circ}\text{F}$  of set point
- Supports BAS integration for communicating critical data (including over-temp conditions) that can be fed into a hospital water quality management plan
- Mitigates risk of Legionella with Sanitization mode
- Prevents stagnant conditions with pump control that circulates water
- Combined with point-of-use protection, allows for elevated circulation temperatures to prevent Legionella per ASHRAE & CDC guidelines

## SmartStream® UV Ultraviolet Disinfection System

- Provides affordable way to protect against bacteria Legionella and other waterborne bacteria and pathogens
- Removes dissolved substances such as hardness minerals, iron, manganese, and tannin
- Protects plumbing system equipment while ensuring production of safe, high quality water

## OneFlow® Anti-scale System

- Limits the buildup of scale in pipes and valves, which can help other Legionella risk mitigation solutions work more efficiently and effectively
- Prevents mineral build-up inside pipes, fixtures and appliances
- Does not require salt, chemicals or electricity
- Has no regeneration cycle to flush water down the drain

## AERCO Innovation® 1350 Water Heater

- Delivers instantaneous hot water with no storage tank or standing water and temperature control to  $+4^{\circ}\text{F}$
- Provides operating efficiency of 99%
